Profile

Software developer with 5+ years experience delivering solutions that integrate systems, automate workflows and support production environments within the marketing technology and data space. Skilled in designing and building full-stack applications utilising modern JavaScript and TypeScript. Passionate about learning new technologies and exploring emerging AI tools.

Experience

Skie, a Bluprintx Company

January 2026 - current

Marketing Automation Consultant

- Developed bespoke solutions using scripting, SQL, APIs, and data transformations to meet business requirements.
- Analysed client requirements and translated them into scalable technical solutions.
- Collaborated with technical and non-technical stakeholders in agile project teams to deliver client solutions.
- Produced technical documentation, implementation guides, and knowledge transfer materials for internal teams and clients.

DXC Technology

October 2021 - January 2026

Marketing Cloud Developer

- Designed, built, and maintained automated workflows, customer journeys, and data-driven campaigns using SQL, AMPscript, Server-Side JavaScript (SSJS), and platform APIs.
- Investigated production incidents, performed root-cause analysis, and implemented fixes to improve system performance, stability and reliability.
- Collaborated with cross-functional teams including developers, architects, business analysts, and stakeholders to gather requirements and deliver scalable technical solutions.
- Participated in code reviews, testing, deployment activities, and documentation of technical implementations.

Education

Coder Academy

Diploma of Information Technology
Completed in 2021

University of Wollongong

Bachelor of Commerce – Accounting and Finance
Completed in 2019

Tech Stack

JavaScript, TypeScript, React, Node.js, Express.js, SQL, PostgreSQL, Ruby, Ruby on Rails, HTML, CSS, Tailwind CSS, Git, GitHub, Linux, Salesforce Marketing Cloud, Salesforce Data Cloud

Projects

RSVP Website: <https://blagasaga2026.rsvp/>

Designed, developed and deployed a full-stack wedding RSVP website using React, Tailwind CSS, Node.js, Express.js, and Supabase. Built individual logins and RSVP features including dietary preferences, song requests, event schedules and FAQs. Architected and maintained a live production application, providing an alternative to third-party event management websites.
